Volume 426, Numbers 1–2, 15 April 1997

JOURNAL OF
ELECTROANALYTICAL
CHEMISTRY

Contents

Preliminary notes

High efficiency electrochemical reduction of N_2O on ZnO and In_2O_3 oxide semiconductor electrodes
A. Kudo and A. Mine 1

A model for ion transfer through liquid|liquid interfaces
W. Schmickler 5

Two-dimensional infrared correlation analysis of electrochemical reactions
M. Osawa, K. Yoshii, Y.-i. Hibino, T. Nakano and I. Noda 11

Electrocatalytic reduction of molecular oxygen using non-planar cobalt tetrakis-(4-sulfonatophenyl)-β-octabromoporphyrin
F. D'Souza, Y.-Y. Hsieh and G.R. Deviprasad 17

A photoresponsive molecular assembly consisting of ruthenium(II) tris(2,2′-bipyridine)–viologen linked disulfide and hexadecanethiol prepared on a gold surface: effect of viologen moiety
S. Yamada, Y. Koide and T. Matsuo 23

Platinum hexacyanoferrate: a novel Prussian Blue analogue with stable electroactive properties
S. Liu, H.L. Li, M. Jiang and P. Li 27

Regular papers

Effect of the specific ion adsorption on the impedance of an interface between two immiscible electrolyte solutions
Z. Samec 31

Polarization phenomena at the water|*o*-nitrophenyl octyl ether interface. Part II. Role of the solvent viscosity in the kinetics of the tetraethylammonium ion transfer
Z. Samec, J. Langmaier and A. Trojánek 37

Growth of compact layers at the interface. Part VIII. Surface aggregation of α- and γ-cyclodextrins in aqueous solutions of potassium fluoride
L. Pospíšil and M. Švestka 47

Infrared spectroscopy of model electrochemical interfaces in ultrahigh vacuum: coupled influence of double layer anion/cation solutes upon acetone solvent chemisorption on Pt(111)
I. Villegas and M.J. Weaver 55

Electrochemical reduction of pyrethroid insecticides in non-aqueous solvents
D.C. Coomber, D.J. Tucker and A.M. Bond 63

Voltammetric detection of NO in the rat brain with an electronic conducting polymer and Nafion® bilayer-coated carbon fibre electrode
B. Fabre, S. Burlet, R. Cespuglio and G. Bidan 75

Photoinduced electron transfer from porphyrin to C_{60} in a C_{60}|porphyrin double-layer photoelectrochemical cell
K. Takahashi, K. Etoh, Y. Tsuda, T. Yamaguchi, T. Komura, S. Ito and K. Murata 85

Liquid junction potential between different solvents: a junction with an alkaline earth metal salt as electrolyte
K. Izutsu, T. Arai and T. Hayashijima 91

Effect of electropolymerization temperature on structural, morphological and conductive properties of poly(aniline) deposits prepared in 1,2-dichloroethane without a proton donor
K. Teshima, K. Yamada, N. Kobayashi and R. Hirohashi 97

On some mechanistic aspects of the electrochemical oxidation of lactose at platinum and gold electrodes in alkaline medium
H. Druliolle, K.B. Kokoh, F. Hahn, C. Lamy and B. Beden 103

Electrocatalytic reduction of dioxygen at macrocycle conducting polymer electrodes in acid media
O. El Mouahid, C. Coutanceau, E.M. Belgsir, P. Crouigneau, J.M. Léger and C. Lamy 117

Glassy carbon electrode modified by conductive, polymeric nickel(II) porphyrin complex as a 3D homogeneous catalytic system for methanol oxidation in basic media
A. Ciszewski and G. Milczarek 125

Membrane-free, rhodium-modified, methyl silicate–graphite amperometric biosensor
S. Sampath and O. Lev 131

Contents

The electrochemical characteristics of an inorganic monolayer film modified gold electrode and its molecular recognition of alkali metal cation
J.-J. Xu, H.-Q. Fang and H.-Y. Chen 139

Voltammetric studies of ferrocene and the mercury dithiophosphate system at mercury electrodes over a temperature range encompassing the mercury liquid–solid state transition
A.M. Bond, R. Colton, J. Harvey and R.S. Hutton 145

Surface modification of platinum thin film electrodes towards a defined roughness and microporosity
E. Aschauer, R. Fasching, M. Varahram, G. Jobst, G. Urban, G. Nicolussi, W. Husinsky, G. Friedbacher and M. Grasserbauer 157

Comparison between charged, charged at the pzc and uncharged interfaces: a peculiar case related to the origin of the polarization catastrophe
P. Nikitas 167

Hydrogen + oxygen recombination and related heat generation in undivided electrolysis cells
F.G. Will 177

Laser spectroelectrochemistry of α,β,γ,δ-tetra-(4-trimethyl ammonium phenyl) porphyrin
J.-M. Hu, Y. Hu, Q. Hu and J. Chen. 185

Short communications

AFM and STM characterization of electrochemically modified electrodes based on a new Ni-dibenzotetraaza(14)annulene
B. Keita, Y.W. Lu, L. Nadjo and T.T. Le 191

Electrocatalytic oxidation of alkenes by water-soluble manganese porphyrins in aqueous media: a comparison of the reaction products at different oxidation states
M.-h. Liu and Y.O. Su 197

Announcement 205
